

Commercial Proposal

Kubo

We are a hub of technological solutions that drives the sustainability of our clients and partners.

Our purpose is to transform the way companies operate by promoting environmental responsibility, economic development, and operational efficiency.

We offer platforms for tax document management, logistics automation, device monitoring, and corporate education that address challenges and create opportunities for businesses and people alike.

Aligned with ESG principles, **we promote efficiency and environmental responsibility through initiatives such as our carbon offset programme.**

We believe that applying intelligence to processes and data contributes to more conscious and sustainable growth.

Our portfolio meets essential market needs, providing solutions that enable companies to focus on growth.

Logistics

A platform for sustainable, high-performance logistics operations.

Fiscal

Compliance and efficiency in managing tax documents.

Devices

Print outsourcing solutions that drive optimisation and cost savings.

Corporate Education

An intuitive platform for team learning and development.

Environmental Sustainability

Solutions for carbon emissions compensation.

Manage, access, and monitor your company's most valuable asset: **KNOWLEDGE.**

Kubo is a 100% cloud-based **Learning Experience Platform (LXP)** designed for **managing corporate education**. Our solution helps organisations engage and develop their teams by promoting the spread of knowledge in a simple and intuitive way.

Our approach makes learning easier and strengthens human capital, building productive and specialised teams that generate strategic value for the business. Furthermore, it makes corporate learning more effective by combining scalability and flexibility to support educational growth in companies of all sizes.

100% Cloud Environment: Cloud-based platform with continuous availability, eliminating the need for physical infrastructure and ensuring global accessibility.

Support and Onboarding: Dedicated help centre and onboarding assistance for quick implementation and continuous support.

Personalisation and White Label: A flexible environment with customisation options that reflect your company's visual identity and deliver a unique learning experience.

API Integration and SSO: Connectivity with corporate systems via API and simplified access through Single Sign-On, facilitating user access and management.

Our Values:

Innovation and Excellence: Commitment to advanced technologies that optimise knowledge management.

People-Focused: Supporting the development and growth of teams, adapting to each client's specific needs.

Compliance and Security: Respect for privacy and data protection regulations, ensuring a secure environment.

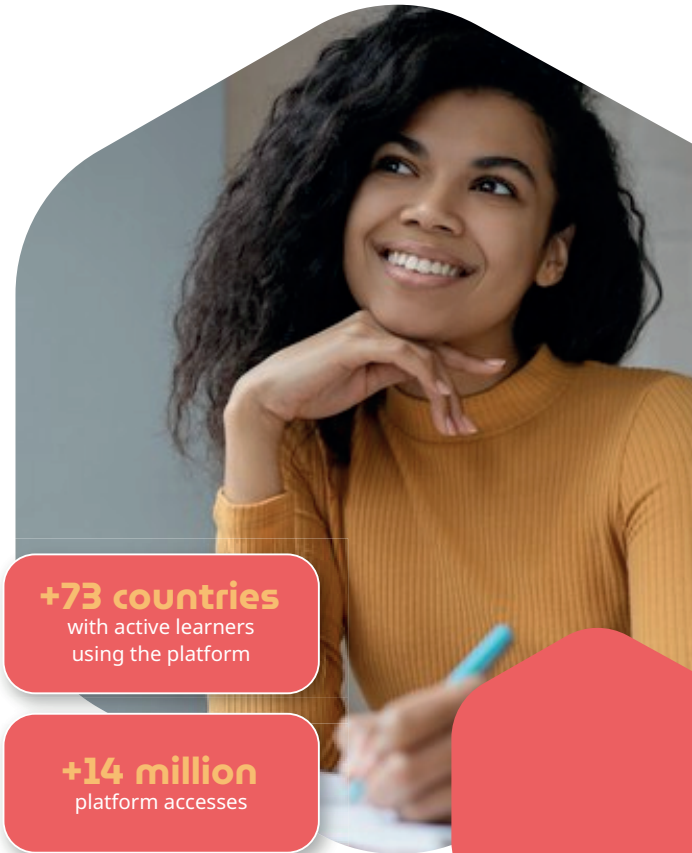

Why Choose Kubo LXP?

With Kubo, your company has access to a complete solution for corporate education that simplifies team development and promotes a culture of continuous learning.

Deliver an **outstanding learning experience** using multiple media formats and access modes.

Create **courses and learning paths for remote corporate education**, removing geographical barriers and keeping your content **available 24/7**.

Flexible Pricing – Pay Only for What You Use! Our pricing model is based on the number of active learners — those registered and with access enabled on the platform. Deactivated or former learners have their historical data preserved but are not counted in the package.
